EDUCATION

Georgia Institute of Technology — May 2026
Bachelor of Science in Computer Science (Threads: Artificial Intelligence, System Architecture)

Fulton Science Academy (Dual Enrollment at Georgia Institute of Technology) — May 2023

RELEVANT COURSEWORK

Courses: DSA, OOP, Design and Algorithms, Computer Organization and Programming, Objects and Design, Perception and Robotics, Linear Algebra, Multivariable Calculus, Differential Equations, Discrete Math

Awards: Google Top 10 Solution Challenge, Regeneron HealthTech Winner, UC Berkeley AI Hackathon Winner, MIT Quantum Computing Winner, AI ATL Hackathon Winner, Cornell Health Hackathon Winner, Congressional App Challenge Winner, Fusen VC-Backed Founder, National Merit Scholarship Finalist

Clubs: Startup Exchange (Exec Team), RoboJackets (SWE Team), Quantum Computing Association

SKILLS

Languages: Python, Java, C, C++, C#, JavaScript, TypeScript, HTML, CSS, R, Swift, Kotlin, SQL, Assembly

Technologies: ReactJS, MySQL, ExpressJS, NextJS, AngularJS, React Native, TensorFlow, PyTorch, Kubernetes, Django, Flask, Docker, GraphQL, GCP, AWS, Firebase, CUDA, MongoDB, Docker, ROS2, Git

WORK EXPERIENCE

VDart - Software Engineering Intern, AI R&D | *Python, LLM, ReactJS, Express, Git*   May 2024 – Aug 2024
- Engineered ML pipeline to automate resume screening and analyze/authorize personalized virtual interviews.
- Developed an AI search tool to streamline access to organizational knowledge leveraging knowledge graph LLM.

Churn - Software Engineering Intern | *Python, ReactJS, SQL, Express, Git*   Jan 2024 – April 2024
- Crafted ML optimization model to analyze credit card data for optimal benefits recommendations.
- Developed an accounts system with enhanced UI/UX, increasing engagement by 35% and retention by 20%.
- Optimized data accuracy by automating credit card scraping process to populate SQL database.

VigilAI - Founder | **160K Seed Funding Raised** | *Python, NLP, Deep Learning, Git*   Nov 2023 – Present
- Engineered ML pipeline (Speech Separation, Voice Fingerprinting, Sentiment Analysis) with Whisper.
- Developed Multiagent Finetuned LLMs, deployed with a central RAG on NVIDIA G5 EC2 instances.
- Trained ML Video Recursion Models on 50,000 hours of body camera footage through UCFPD and GTPD.
- Leveraged AWS GovCloud Architecture for beta testing across 10+ police departments in the U.S.

Georgia Tech Research Institute - Research Intern | *Python, C++, ROS, SolidWorks, Git* June 2022 – July 2022
- Automated UR3 industrial robotic arm with ROS2 and finite state machine for IOT-enabled stem cell transport.

PROJECTS

Spark - Winner at UC Berkeley AI Hackathon 2024 (Largest AI Hackathon in US)
- Developed NextJS app to identify successful cold calling techniques with HumeAI and Multi-Agent LLM's.

1Record - Winner at Cornell Health RX Hackathon 2024
- Developed a MERN app to analyze patient symptom patterns, enabling prediction of patient outcomes.
- Vectorized 100K EHR records to store contextual representations of a patient history in MongoDB Vector Search.

Therapute - Google Solution Challenge Top 10 Global Winner | **Represented USA (8000 Applicants)**
- Developed MERN platform, enabling patients to receive AI-driven insights on their physiotherapy journey.
- Developed a Flask server with OpenCV and Mediapipe integrations to perform Time-Series Forecasting.

QForce - MIT Quantum Computing Hackathon Winner | **Quandela Photonic Chip Challenge**
- Developed a QGAN model with a classical optimizer to achieve high-fidelity qubits on NISQ hardware.
